The Academy of Veterinary Technicians in Clinical Practice

General Application Packet 2023-2024 Case Year

SUBMISSION GUIDELINES

The application year begins July1, 2023 and ends at 11:59pm June 30, 2024. All skills, logs, reports, reference, and signatures must be obtained during the application year.

The Pre-Application must be submitted no later than 11:59pm PST, September 30, 2023. All of the Pre-Application is to be completed by filling out online forms available by the provided links on the "Application Information" page of our website.

Once the Pre-Application has been accepted, applicants will receive an invitation to place their Final Application documents in the secure AVTCP DropBox. Case logs must be submitted sequentially in 1 MS Word document. Reports must be submitted sequentially as 1 MS Word document. PDF scans of logs and reports will not be accepted. Other documents may be submitted as PDFs or MS Word documents.

Final Application submissions, including all applicable documents, attachments, and letters of recommendation, will be accepted up to 11:59pm PST, June 30, 2024. No Final Applications will be accepted beyond the due date and time.

The total fee for applying is \$100. The Pre-Application fee of \$50 is required upon submission of the Pre-Application and the Final Application fee of \$50 is required upon submission of the Final Application using the Paypal link provided on the website.

Please be sure the name on your PayPal payment is the same name as on your application and allow enough time to set up your Paypal account in order for AVTCP to receive payment by the due dates and times.

If you have ever had a different name, nickname, or alias that may show up on documents or letters of recommendation, you must alert us of these names by emailing <u>avtcpinformation@gmail.com</u>. If we receive documentation with different names and cannot easily match them to you, they may be discarded and could trigger a failed application.

International applicants must ensure their fee is paid in US dollars.

Pre-Application Due: September 30, 2023

Please go to the AVTCP website's "Application Information" page to access all of the elements required for the Pre-Application. The elements include:

- Waiver, Release, and Indemnity Agreement
- Professional History and attached proof of credentials
- Veterinary Technician Employment History
- Continuing Education Log and attached proof of attendance
- Knowledge List
- Proposed Recommendation Letter Writers
- Payment of \$50

FINAL APPLICATION Due: June 30, 2023

Final Application elements include:

- Exam Questions
- Case Logs
- Case Reports
- Letters of Recommendations
- Payment of \$50

The following documents are general components of the Final Application for potential applicants to refer to. Please see the application on the page of your chosen specialty for the most accurate Final Application as each specialty has their own specific differences and instructions.

Instructions for writing exam questions

<u>Stem</u> - introductory statement (information required) and the question itself that elicits the correct answer.

DO THIS

- Develop patient based questions but don't present a real case. Present a scenario.
- Stems should be complete and as succinct as possible. Avoid adding unnecessary or misleading information.
- The stem should be clear enough to provide the examinee with sufficient information to anticipate the type of answer before looking at the responses.
- Items should be written to assess knowledge of meaningful facts and concepts, not trivial information. Avoid tricks.
- 5) Include in the stem all words that would otherwise have to be repeated in each of the responses.

DON'T DO THIS

- 6) Don't test more than one point
- Avoid using "What would you do?" or "What do you believe?" as these statements cannot be tested
- 8) Avoid the use of gender pronouns
- 9) Avoid ambiguous terms such as rarely, commonly, frequently, generally, sometimes and usually. Avoid jargon
- 10) Never use flawed question formats – negative question, true/false, least likely, none of the above, all of the above

<u>Responses or Options</u> – 1 correct "answer" plus 3 incorrect "distractors".

- a) Always list the correct answer first.
- b) Always start with a capitol letter unless part of a sentence.
- c) The correct answer must be <u>absolutely</u> correct. Pitfall: Lack of one clearly best answer
- d) Incorrect answers should be realistic and plausible. No nonsense distractors
- e) Make sure you aren't including unintentional clues to the correct answer
- f) Distractors should represent unsafe practices or commonly held misconceptions and should be plausible.
- g) All responses should be grammatically consistent with the item stem, and all responses should be parallel.
- h) Do not make the correct answer substantially longer or more detailed than the distractors
- i) Do not use non-homogenous options, don't make the candidate choose between apples and oranges

<u>Rationale</u> – Brief statement explaining the testing point, be sure to describe

(1) the testing point

- (2) why you picked the different options
- (3) why the indicated answer is best.

<u>References</u> – Author, Title, Publisher, year, page

- References should be current, ideally less than 10 years and on the reading list of the specialty.
- Avoid proceedings or journal articles as not every candidate will have access to these documents.
- References must agree. For example, normal heart rate of a dog differs slightly depending on the text. There is no one answer.

AVTCP EXAM QUESTION FORM

- Please submit 5 exam questions specific to your practice category for committee review for possible use on future AVTCP examinations.
- These questions must be advanced in nature and follow the AVTCP format using the instruction provided.
- Each question must come from a different domain and species (where multiple species applies).
- Questions must be submitted in a WORD document only.

Question # _____

Question: (Stem)

Responses: (Please list the correct response **first**, capitalize first letter of each response)

A. B. C. D.

Reference: (Source you would quote to prove the correct answer is in fact correct)

Author: Title: Publisher: Year: Page(s):

Rationale: (A short statement explaining the testing point)

AVTCP CASE LOGS – Instructions

Case logs are scored on a points system. Failure to follow the instructions below will result in loss of points which, if exceed the acceptable amount, will result in failure of the log.

- A *minimum* of 50 cases reflecting the mastery of advanced clinical practice knowledge and skills are required. Applicants are encouraged to submit > 50 cases (maximum of 75) as individual cases may be rejected.
- Logs must be submitted in one complete WORD document, not multiple documents or as PDFs.
- Acceptable case logs must be taken from experience obtained while practicing with companion animals or production animals relevant to your specialty category. Case logs taken from zoo medicine, laboratory medicine, shelter medicine, or wildlife medicine will not be accepted. All animals must be "owned" by a client and not belonging to the applicant.
- Cases submitted must take place between July1and June 30 of the application year and should be listed in chronological order from oldest to newest.
- A *minimum* of 80% of the skills list must be mastered and cross-referenced in the case logs. Mastery is defined as being able to perform the task safely, with a high degree of success, and without being coached or prompted.
 - Once a skill is performed and mastered, it should be noted on the skills list and witnessed as instructed.
 - The corresponding number of the skill should be indicated in parentheses after describing the skill within the log. While you only need to cite each skill once on the skill sheet, please indicate the skill number in every log after each time you perform it.
 - Select cases that demonstrate more than one advanced skill and include a variety of differing cases and procedures.
- Please be sure to specify details, such as sites/locations for skills list items such as IV catheter placement and size, venipuncture site, drug administration route, etc.
- The AVTCP case log outline should be utilized. Each case log should be numbered individually and no case log should be longer than one page in length.
- Each case log should only include details for a single patient visit. Multiple visits by the same patient count as only one case unless presented for an entirely new problem.
- Abbreviations should be expanded on first mention if not on AVTCP's acceptable abbreviation list in each individual case log. If expanded and abbreviated on case log #1, it must ALSO be expanded on first mention for any case log where that same abbreviation is used again.
- Logs should be written in 3rd person with perfect spelling and grammar.
- Logs should be written in Times New Roman 10pt with 1" margins, single-spaced.
- Medications should be referred to by generic drug name, not brand or trade name. If a medication has no generic name, it must be noted with proper marks, E.G. Nocita® or ProviableTM.
- Drug dosages must be expressed in metric units with specific dosage, time intervals, and route of administration.
 - Correct enrofloxacin (10mg/kg) 200 mg IV q12h ; Incorrect Baytril [®] 8.8 mL bid.
 - *Rounding of doses is only acceptable for medications given per os.*
 - *Medications being dispensed for home use must include duration of use.*
 - Dosing information only has to be mentioned once per log unless doses changes.
- Please see any additional case log requirements in your specific practice category application.

Advanced skills &]	procedures p	erformed			
Outcome					

AVTCP CASE REPORTS – Instructions/Guidelines

- Four (4) complete case reports are required.
- Cases submitted must take place between July1 and June 30 of the application year.
- Acceptable case reports in clinical practice must be taken from experience obtained while practicing with companion animals or production animals relevant to your specialty category. Case reports taken from zoo medicine, laboratory medicine, shelter medicine, or wildlife medicine will not be accepted. All animals must be "owned" by a client.
- Case reports will not be accepted from patients belonging to the applicant.
- Reports must be no more than five (5) pages each, 1" margins, Times New Roman 10pt., and double-spaced. References and any appendices (E.G. laboratory and/or diagnostic imaging reports, etc.) are not included as part of the five-page maximum and may be submitted separately.
- The case report must be taken from a case logs. The case log# must be included in the case report.
- Abbreviations should be expanded on first mention if not on AVTCP's acceptable abbreviation list in each case report.
- Please be sure to specify details, such as sites/locations, IV catheter placement and size, venipuncture site, drug administration route, etc.
- Reports must demonstrate expertise in the management and treatment of clinical cases and will be reviewed for overall quality of nursing care, therapy instituted by the technician, goals of care and therapy, and the technician's role in the management as it relates to the case.
- All case reports involving procedures with animals that are heavily sedated or anesthetized must include an anesthetic monitoring log. This report is not included as part of the 5-page maximum.
- Case reports will also be scored on:
 - Writing (use of scientific language, style, grammar, syntax, ability to communicate clearly, concisely yet thoroughly).
 - **Disease/condition** (demonstrating a clear understanding of the disease/condition and explaining the relevant anatomy, pathology and pathophysiology).
 - **Diagnostics** (explanation of diagnostics including reason for test, role in performing test, both normal & abnormal results and nursing response to test).
 - Nursing care and therapy (explanation of goals of nursing care and therapy and role in care).
 - Pharmacology (demonstrating a strong grasp of pharmaceuticals used including all areas of treatment, including anesthesia/analgesia, plus mastering their role of calculating, administering, and explaining the use of the medications).

- Appendices may be included if necessary/desired (ECG tracings, chemotherapy protocols, radiology reports, etc.).
- Reports should be written in 3rd person with perfect spelling and grammar.
- The use of references is encouraged. Plagiarism will result in immediate rejection.
- Medications should be referred to by drug name, not brand or trade name. If a medication has no generic name, it must be noted with proper marks. E.G. Nocita® or Proviable[™].
- Drug dosages must be expressed in metric units with specific dosage, time intervals, and route of administration.
 - Correct enrofloxacin (10mg/kg) 200 mg IV q12h ; Incorrect Baytril [®] 8.8 mL bid.
 - *Rounding of doses is only acceptable for medications given per os.*
 - *Medications being dispensed for home use must include duration of use.*
 - Dosing information only has to be mentioned once per report unless doses changes.
- Any attached laboratory reports should be reported in Conventional Units. The following internet conversion page is acceptable to use: <u>AMA Manual of Style Conversion Calculator</u>

Please see any additional case report requirements in your specific practice category application.

AVTCP CASE REPORTS - Format

AVTCP Case Report # Case Log# Title Author

Signalment

Age, weight, species, breed, gender, BCS, pain score

Presenting Complaint

History

Physical Exam Findings/Observations (admit/first contact)

Problem List/Differential Diagnosis

Diagnostic Approach

Include whether lab work was performed in-house or at an outside laboratory.

Treatment Plan

Final Diagnosis

Outcome

Necropsy and postmortem testing should be included here if appropriate.

Conclusion/Case Summary

Include information on the disease/condition, the typical history and presentation, the diagnostic approach, treatment and management options, expected outcome and prognosis, and any other pertinent information. Information should be current and high quality; standard textbooks and peer-reviewed journal articles are preferred. All researched information is to be cited.

Discussion

The Discussion section is used to evaluate and critique the case. Unlike the actual Case Report, which is an objective recording of the facts of the case, the Discussion is a subjective analysis of the case management. Explain any deficiencies or potential errors in the case, and justify any steps taken or choices made that differ from case management.

AVTCP ACCEPTABLE ABBREVIATIONS

These abbreviations may be used without expansion in AVTCP applications:

Ab	antibody	FIP	feline infectious peritonitis
ACT	activated clotting time	FIV	feline immunodeficiency
aPTT	activated partial	virus

AVTCP Small Animal (CANINE/FELINE) Skills List

A minimum of 80% of the skills must be mastered. Skills **must** be demonstrated and cross referenced in your case logs.

Items denoted with an ** are considered mandatory skills and must be completed.

- Mastery is defined as being able to perform the task safely, with a high degree of success, and without being coached or prompted. Mastery requires having performed the task in a wide variety of patients and situations.
- The use of cadavers, clinic animals, or personal pets is **unacceptable**.

	Case Log	
Skill	Number(s)	Signature of Veterinarian or VTS

General Nursing	
1. Perform a comprehensive physical exam on at least	
ONE dog and ONE cat. Examination of multiple life stages	
(juvenile, adult, and geriatric) is encouraged. Assess and	
document findings including weight, temperature, heart	
rate, pulse rate, respiratory rate, heart/lung sounds, BCS,	
numerical pain score, hydration status, and any abnormal	
findings. **	
2. Recognize and document signs of respiratory failure	
and/or shock.	
3. Accurately and efficiently triage patients presenting for	
emergent conditions. Document presenting condition,	
observations, vitals, and steps taken in response in patient	
status.	
4. In association with other medical team members,	
administer CPR, evaluate effectiveness, and institute	
therapy. Adherence to current evidence-based RECOVER	
CPR guidelines is strongly encouraged.	
5. Demonstrate knowledge of substances/items that, when	
ingested, result in toxicity/foreign body and appropriate	
interventions.	
Demonstrate efficient and accurate calculation of drug	
doses, IV fluid rates, and constant rate infusions (CRIs).	
Calculations must be included in log. **	
7. Demonstrate thorough knowledge of metric conversions	
using both kg and m ² . Calculations must be included in	
log.**	
8. Demonstrate mastery of venipuncture in healthy, sick	
and/or debilitated canine and feline patients in a variety of	
locations (jugular, forelimb, hindlimb). Log location.	
9. Demonstrate mastery of peripheral IV catheter	
placement in a variety of sites in healthy, sick and/or	
debilitated canine and feline patients and demonstrate	
proper care and use of the catheter and IV line. Log at least	
two different peripheral locations (lorening and hindling).	
10. Demonstrate central line, PICC, and/or jugural catheter	
proper care and use of the eatheter and IV line	
11 Demonstrate arterial estheter placement in a	
canine/feline nations and demonstrate proper care and use	
of the catheter and IV line	
12 Demonstrate through the needle catheter placement in	
a canine/feline patient and demonstrate proper care and	
use of the catheter and IV line.	
13. Demonstrate intraosseous catheter placement in a	
canine/feline patient and demonstrate proper care and use	
of the catheter and IV line.	
14. Set up and maintain an IV fluid pump, be able to	
troubleshoot equipment malfunction note administration	
problems, and take corrective measures. Log details.	
15. Set up and maintain a syringe pump, be able to	
troubleshoot equipment malfunction, note administration	
problems, and take corrective measures. Log details.	
16. Administer crystalloids and/or colloids, monitor	
administration, and adjust administration in response to	
therapy and patient status.	
17. Administer blood or blood products, monitor	
administration and adjust administration as required. Log	
component used, monitoring, and any intervention required.	

18. Demonstrate mastery of cystocentesis in both the canine and feline, either blind or ultrasound guided. Log any adverse events if indicated (e.g. vagal response, hemorrhage, uroabdomen, etc.).		
19. Demonstrate proficiency in urinary catheter placement in a canine and/or feline.		
20. Demonstrate proficiency in urinary catheter maintenance in a canine and/or feline.		
21. Set up and perform diagnostic non-invasive blood pressure measurement in a canine and a feline patient. Specify the method used (oscillometric, Doppler, etc.) and		
log values.		
22. Set up and perform diagnostic invasive blood pressure measurement via pressure transducer or aneroid		
steps performed and log values.		
 Set up and perform a diagnostic ECG. Log heart rate and rhythm. 		
24. Recognize normal and abnormal ECG tracings. Log observed arrhythmia.		
25. Demonstrate mastery of proper wound management techniques and/or bandage placement. Log at least 2		
different wounds/bandages - specifying location and		
26. Demonstrate mastery of proper application of splints.		
Log location and type.		
27. Accurately and efficiently perform ocular diagnostic		
tests (including tonometry, fluorescein staining and/or		
28 Determine nutritional requirements for different life		
stages life styles and disease processes in the canine and		
feline. Log calculations.		
29. Calculate and administer nutritional support through a		
variety of techniques (assisted feeding, feeding tubes,		
parenteral nutrition, etc.). Log calculations.		
30. Demonstrate proper placement and/or maintenance of		
at least 1 WO of the following types of enteral feeding		
tubes: hasogastinc, hasoesophageal, orogastinc,		
maintenance and tube feeding protocols		
31. Administer thoracic physiotherapy to a canine and/or		
feline (nebulization, coupage, etc.)		
32. Demonstrate proficiency in appropriately performing in		
TWO rehabilitation techniques including massage therapy,		
cryo/heat therapy, range of motion, low level laser therapy,		
etc. Specify laser class and appropriate PPE if indicated.		
00 Demonstrate and a million of a latitude for the	1	I
33. Demonstrate proper nursing care techniques for the		
urinary bladder care, proper bedding, safe manipulation of		
position, etc.		
34. Demonstrate proper isolation procedures, care of		
isolation suite, and isolation protocols.		
35. Demonstrate proper nursing care of neonates in the		
hospital setting. Log all nutritional interventions and		
techniques.		
Anesthesia/ Analgesia		
36. Assign appropriate ASA status after reviewing patient		
veterinarian I on the justification for your choice **		

54. Set up, test, and/or troubleshoot a rebreathing system. Log testing steps.	
55. Set up, test, and/or troubleshoot a non-rebreathing	
system. Log testing steps.	
56. Set up, test, and/or troubleshoot an anesthesia	
machine (oxygen tank/compressor, vaporizer, CO2	
absorbent canister). Log testing steps.	
57. Set up, test, and/or troubleshoot a waste gas	
scavenging system. Log testing steps.	
Surgical Nursing	
58. Demonstrate extensive knowledge of and ability to set	
up necessary equipment and supplies for a variety of	
surgeries (i.e., reproductive tract, GI tract, ophthalmic,	
orthopedic, soft tissue, endoscopy, laparoscopy). Log at	
least FIVE different surgical procedures. **	
59. Coordinate the process of preparation and positioning	
of patients for a variety of surgical procedures (i.e.,	
reproductive tract, GI tract, ophthalmic, orthopedic, soft	
tissue, endoscopy, laparoscopy). Log at least FIVE different	
surgical procedures.	
60. Coordinate the process of preparation, safe use, and	
maintenance of suction equipment, electrocautery, smoke	
evacuator, and/or surgical laser units.	
61. Demonstrate proper pre-operative nursing care of	
anesthetic complications	
62 Demonstrate proper post operative purging care of	
62. Demonstrate proper post-operative nursing care of	
63 Demonstrate the proper care of surgical instruments

 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct partice and basic to active to the set TLDET. 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE different tests. 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE different tests. 70. Properly collect and/or handle and process an arterial blood datas sample. Log datasite 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE different tests. 70. Properly collect and/or handle and process an arterial blood gas sample. Log details. 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE different tests. 70. Properly collect and/or handle and process an arterial blood gas sample. Log details. 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE different tests. 70. Properly collect and/or handle and process an arterial blood gas sample. Log details. 71. Properly collect and/or handle and store samples of an excretion, secretion, or effusion for laboratory evaluation. 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE different tests. 70. Properly collect and/or handle and process an arterial blood gas sample. Log details. 71. Properly collect and/or handle and store samples of an excretion, secretion, or effusion for laboratory evaluation. 72. Properly collect and/or handle, store, and submit 	
 64. Demonstrate proper sterilization procedures (autoclave, ethylene oxide). Log instrument processing details. Laboratory 65. Demonstrate mastery of all basic laboratory testing (PCV, TP, UA, fecal analysis, external parasite analysis, basic cytology, blood smear evaluation) and evaluation of results. All skills must be logged. ** 66. Utilize, run quality control (QC), and troubleshoot inhouse hematology and clinical chemistry analyzers and evaluate results. Log equipment maintenance and QC. 67. Demonstrate the ability to perform at least TWO different in-house clotting tests (BMBT, ACT, Platelet evaluation, PT, APTT). 68. Demonstrate mastery of in-house blood typing and crossmatching. 69. Demonstrate the ability to obtain samples for tests such as, but not limited to: ACTH stimulation test, HDDST, LDDST, thyroid testing, bile acids, cobalamin/folate, tli, pli, and therapeutic drug monitoring. Note appropriate fasting protocols, correct timing of sample collection, and correct sample collection and handling. Log at least THREE different tests. 70. Properly collect and/or handle and process an arterial blood gas sample. Log details. 71. Properly collect and/or handle, store, and submit cytology samples for laboratory evaluation. Log type of sample (i.e. ENA direct impression). 	

73. Properly collect and/or handle, store, and submit samples for bacterial and/or fungal cultures. Log source and culture medium.		
74. Properly collect and/or handle, store, and submit		
Samples for histopathology.		
75 Safely coordinate the radiographic process by directing		
team members to consistently and efficiently produce		
radiographs of diagnostic quality		
76. Demonstrate proficiency in evaluating the patient's		
condition (medical, surgical, behavioral) and adapting the		
radiographic procedures to those conditions. Log any		
adaptations.		
77. Demonstrate accuracy, efficiency, and safety in		
positioning patients for a variety of radiographic studies		
(thorax, abdomen, spine, skull, extremity, shoulder, pelvis).		
Log at least FIVE different studies. **		
78. Demonstrate accurate and consistent evaluation and		
modification of radiographic technique or positioning. Log		
results of evaluation and modification.		
79. Perform and/or demonstrate the ability to set up and		
assist in contrast studies (i.e. GI studies, cystograms,		
nyleograms) including the set up of necessary equipment, nation of contrast media		
Log any abnormalities		
20 Demonstrate the ability to set up, maintain equipment		
and assist with or perform ultrasonography		
81 Demonstrate the ability to set up maintain equipment		
and assist with or perform advanced imaging techniques		
such as CT or MRI.		
Radioactive lodine		
82. Demonstrate proper radioactive iodine related		
techniques. Using proper protocols, perform and/or assist		
in the administration of radioactive iodine and provide		
appropriate inpatient care with established safety		
procedures. Log steps taken.		
83. Demonstrate radioactive iodine knowledge regarding		
pre- and post-administration client education and the		
maintenance of all appropriate facility records and logs to		
remain compliance with regulatory guidelines.		
Dentistry		
of the second se		
abnormalities and the type of dental chart used **		
25 Efficiently perform a comprehensive oral even		
demonstrated in proper dental charting and notes		
86 Readily identify oral pathology and anatomic		
abnormalities.		
87. Demonstrate proper use and care of dental hand		
instruments (including sharpening and instrument		
processing protocols) and power instruments.		
88. Perform thorough and efficient dental prophylaxis.		
89. Efficiently and consistently produce dental radiographs		
of diagnostic quality demonstrating bisecting angle and		
parallel techniques.		
90. Set up, maintain and troubleshoot all dental equipment.		
Pharmacology		

91. Demonstrate extensive knowledge of groups of drugs, biologics, and supplements, their mechanisms of action	
clinically relevant side effects, and evaluation of the rapeutic	
responses Log drugs from at least THREE categories	
noting drug category side effects and therapeutic effect **	
02 Demonstrate extensive knowledge of types of vaccines	
beir immunological mochanisme, current	
recommendations, and administration schedules. Log	
future vegeine recommendations	
1000 Recommendations.	
93. Recognize adverse vaccine reactions and demonstrate	
proper response and interventions.	
94. Demonstrate proper handling, preparation, and	
administration of chemotherapeutics with appropriate safety	
protocols. Log specific administration protocols and PPE.	
Behavior	
95. Demonstrate knowledge of canine and feline behavior	
including head and body language. **	
96. Demonstrate knowledge of behavioral learning	
concepts (i.e. punishment, positive reinforcement, rewards,	
operant conditioning) detailing problems and	
recommendations.	
97. Recognize appropriate and inappropriate behaviors in	
canines and felines and provide client counseling regarding	
current scientifically based techniques of training,	
management, and behavior modification. Log observations	
and recommendations.	
98 Demonstrate familiarity with a variety of training tools	
(clickers collars/balters etc.) and their uses	
99 Recognize stress when handling canine and feline	
patients and implement low-stress protocols. This may	
include necessary and appropriate sedation/chemical	
restraint I og protocols and any administered medications	
including dose and calculation	
100 Train practice staff in recognizing and managing	
aggressive behavior in the practice setting (i.e. use of	
appropriate restraint techniques)	
appropriate restraint techniques).	
Practice management	
101. Participate in the development and/or maintenance of	
all appropriate facility records and logs in compliance with	
regulatory guidelines (e.g., x-ray, surgery, anestnesia,	
laboratory, controlled substance).	
102.Instruct and supervise staff in the accurate recording of	
medical information.	
103.Participate in the development and/or maintenance of	
appropriate sanitation and hospital- acquired infection	
protocols for a veterinary facility, including patient and	
laboratory areas.	
104.Participate in the development and/or maintenance of	
infectious disease protocols and staff education including	
the recognition of potentially infectious cases and the	
proper handling and housing of those patients.	
105.Demonstrate proficiency at developing and providing	
client education in a clear and accurate manner at a level	
the client understands (i.e., oral and written, including	
educational handouts).	
Euthanasia	
106.Demonstrate skilled application of crisis	
intervention/grief management skills with clients.	

107.Assist with and document euthanasia protocol including sedatives, catheter placement, administration, and euthanasia solution used. Include doses and calculations of all sedatives and euthanasia solution. Document client counseling for euthanasia, method of body disposal, and any referral for grief counseling. Document proper/respectful care and handling of deceased patient. **	
--	--

The AVTCP reserves the right to verify any information that the candidate provides in the application packet

The AVTCP requires that a licensed veterinarian or a Veterinary Technician Specialist who has mastered the skill, attest to your ability to perform the task.

Mastery is defined as being able to perform the task safely, with a high degree of success, and without being coached or prompted.

Mastery requires having performed the task in a wide variety of patients and situations. The applicant must have mastered a minimum of 80% of the skills listed.

All skills **must** be demonstrated in the case logs and reports. Use of cadavers, clinic animals, or personal pets is **unacceptable.**

I, the undersigned, declare that I have read the entire AVTCP application packet.

I further attest that the above-named applicant has achieved the AVTCP definition of mastery for the above skills that are marked with my signature. Mastery is defined as being able to perform the task safely, with a high degree of success, and without being coached or prompted.

Name	/ Printed Name		Signature	Degree
Name		_/	-	_Degree
	Printed Name		Signature	_
Name	Printed Name	/	Signature	_Degree
Name	Printed Name	/	Signature	_Degree
Name	Printed Name	/	Signature	_Degree

Please provide the names and credentials of all persons who have signed this form attesting to your mastery of advanced skills in clinical practice.

KNOWLEDGE LIST

Knowledge of disease processes should include: causes, symptoms, modes of transmission, proper testing, treatment options, and prognosis.

1. Urinary

- a. Normal anatomical and physiological processes
- b. Renal failure (acute/chronic)
- c. Urinary tract infections
- d. FLUTD

- e. Urolithiasis bladder and kidney
- f. Incontinence
- g. Cystitis
- h. Transitional Cell Carcinoma (TCC)
- i. Pyelonephritis
- j. Polycystic kidney disease
- k. Urinary obstruction
- 1. Prostate disease
- m. Ectopic ureters
- n. Protein losing nephropathy

2. Hepatobiliary

- a. Normal anatomical and physiological processes
- b. Feline hepatic lipidosis
- c. Hepatitis (acute/chronic), cholangiohepatitis
- d. Hepatic encephalopathy
- e. Portosystemic shunts (congenital vascular anomaly)
- f. Copper storage disease
- g. Hepatic neoplasia
- h. Gallbladder mucocele
- i. Cholecystic disease
- j. Biliary cysts
- k. Bile duct obstruction
- l. Toxic hepatopathy

3. Gastrointestinal

- a. Normal anatomical and physiological processes
- b. Vomiting/regurgitation
- c. Diarrhea (acute/infectious)
- d. Constipation/obstipation
- e. Esophageal strictures
- f. Megaesophagus
- g. Megacolon
- h. Pyloric outflow obstructions
- i. Gastric ulcers/erosions
- j. Small bowel disease
- k. Large bowel disease
- 1. Inflammatory bowel disease
- m. Gastric dilation-volvulus (GDV)
- n. Colitis/gastritis
- o. Acute hemorrhagic diarrhea syndrome (AHDS)
- p. Malabsorption syndromes
- q. Gastrointestinal neoplasia
- r. Triaditis (cats)
- s. Foreign body/ obstruction/ileus
- t. Intussusception
- u. Neoplasia of the oral cavity
- v. Stomatitis lymphocytic/plasmacytic
- w. Gastritis
- x. Bacterial disease
- y. Parasitic disease
- z. Refeeding syndrome

- aa. Infiltrative diseases
- bb. Protein losing enteropathy
- cc. Short bowel syndrome

4. Endocrine/exocrine

- a. Normal anatomical and physiological processes
- a. Hypothyroidism
- b. Hyperthyroidism
- c. Thyroid neoplasia
- d. Pancreatitis (acute and chronic)
- e. Exocrine pancreatic insufficiency
- f. Insulinoma
- g. Hypoadrenocorticism
- h. Hyperadrenocorticism (pituitary dependent vs. functional adrenal tumors)
- i. Diabetes mellitus (canine/feline)
- j. Diabetic ketoacidosis
- k. Pheochromocytoma
- 1. Diabetes insipidus
- m. Growth hormone disorder
- n. Hypoparathyroidism
- o. Hyperparathyroidism

5. Reproductive

- a. Normal anatomical and physiological processes
- b. Breeding/ reproduction techniques
- c. Neonatal care
- d. Prostatic disorders
- e. Dystocia
- f. Eclampsia
- g. Pyometra, metritis
- h. Uterine prolapse
- i. Mastitis
- j. False pregnancy
- k. Mammary tumors

6. Immunological

- a. Normal anatomical and physiological processes
- b. Immunoglobulins
- c. Immune mediated hemolytic anemia
- d. Immune mediated thrombocytopenia
- e. Vaccine reactions
- f. Feline leukemia
- g. Feline Immunodeficiency Virus
- h. Feline Infectious Peritonitis
- i. Systemic Lupus Erythematosus (SLE)
- j. Idiopathic polyarthritis

7. Respiratory

- a. Normal anatomical and physiological processes
- b. Upper respiratory tract infection
- c. Laryngeal paralysis
- d. Brachycephalic syndrome

- e. Tracheal collapse/stenosis
- f. Pneumonia (viral, bacterial, fungal)
- g. Pulmonary thromboembolism
- h. Epistaxis
- i. Feline asthma
- j. Pneumo/hemo/chylo/pyothorax
- k. Pleuritis/pleural effusion
- 1. Pulmonary edema
- m. Diaphragmatic hernia
- n. Feline respiratory disease complex
- o. Canine respiratory disease complex
- p. Neoplasia

8. Cardiovascular

- a. Normal anatomical and physiological processes
- b. Hypertension/hypotension
- c. Arterial thromboembolism, saddle thrombus
- d. Caval syndrome
- e. Arrhythmias
- f. CHF
- g. Cardiomyopathy (dilated & hypertrophic)
- h. Pericardial effusion
- i. Heartworm disease
- j. Congenital and inherited abnormalities
- k. Heart sounds and murmurs
- l. PDA, AS, VSD
- m. Cardiac tamponade

9. Neurogenic

- a. Normal anatomical and physiological processes
- b. Seizures
- c. Vestibular disease
- d. Hydrocephalus
- e. Idiopathic epilepsy
- f. Cerebellar hypoplasia
- g. Laryngeal paralysis
- h. Neoplasia
- i. Intervertebral disk disease
- j. Horner's Syndrome
- k. Diabetic neuropathy
- 1. Degenerative myelopathy
- m. Myasthenia gravis
- n. Masticatory muscle myositis
- o. Wobblers
- p. GME
- q. Trauma
- r. Congenital

10. Hematologic

- a. Normal anatomical and physiological processes
- b. DIC
- c. von Willebrand disease (vWD)

- d. Hemophilia
- e. Anemia (regenerative/nonregenerative)
- f. Polycythemia
- g. Leukocytic disorders (leukemia, lymphoma, leukocytosis, leukopenia)
- h. Blood transfusions
- i. Platelet disorders (thrombocytopenia/thrombocytosis)
- j. Coagulopathies

11. Dermatologic

- a. Normal anatomical and physiological processes
- b. Flea allergic dermatitis (FAD)
- c. Atopy
- d. Allergy testing
- e. Otitis externa
- f. Auricular hematomas
- g. Food hypersensitivity
- h. Dermatophytosis
- i. Urticaria
- j. Pyoderma
- k. Neoplastic skin disease (e.g. mast cell tumors)
- 1. Perianal fistulas
- m. Anal sac disease
- n. Mange (sarcoptes, demodex)
- o. Cheyletiella
- p. Lick granulomas

12. Ophthalmology

- a. Normal anatomical and physiological processes
- b. Corneal Ulcers
- c. Prolapsed nictitans (cherry eye)
- d. Nuclear sclerosis
- e. Glaucoma
- f. Uveitis
- g. Cataracts
- h. Conformational abnormalities (entropion/ectropion)
- i. Conjunctivitis
- j. Neoplasia (adenocarcinoma, melanoma)
- k. Luxated Lens
- 1. Keratoconjunctivitis sicca (KCS)/dry eye

13. Musculoskeletal

- a. Normal anatomical and physiological processes
- b. Arthropathies (hip/elbow dysplasia, patellar luxation)
- c. Eosinophilic myositis
- d. Hypertrophic osteodystrophy
- e. Panosteitis
- f. Osteochondritis dissecans
- g. Joint trauma (Cranial cruciate ligament, hip luxation)
- h. Achondroplasia
- i. Osteosarcoma
- i. Leggs Perthes disease
- j. Nutritional osteodystrophies (rickets, osteomalacia)

- k. Shifting leg lameness
- l. Osteoarthritis
- m. Degenerative joint disease (DJD)

14. Nutritional

- a. Prevention and treatment of disease states
- b. Proper nutrition for life stages/ lifestyle
- c. Proper use and recommendations of veterinary diets
- d. Obesity/Malnutrition
- e. Parenteral/non-parenteral nutrition
- f. Calculating RER and disease state requirements

15. Behavior

- a. Housetraining
- b. Crate training
- c. Destruction: Alternatives to declawing
- d. Food aggression
- e. Separation anxiety
- f. House soiling/spraying
- g. Basic obedience
- h. Puppy / kitten play-biting/ aggression

16. Fluid and electrolyte disorders

- a. Dehydration/overhydration
- b. Acid-base abnormalities
- c. Electrolyte abnormalities

17. Infectious disease

- a. Sanitation protocols
- b. Bacterial
- c. Fungal
- d. Viral
- e. Parasitic

18. Toxins

- a. Ethylene glycol
- b. Common NSAIDS
- c. Topical pesticides (organophosphates, pyrethrins, etc.)
- d. Common food toxins (chocolate, grapes, onion, xylitol, etc.)
- e. Rodenticides
- f. Common household plants (lily, spider plant, holly, poinsettia, etc.)
- g. Alcohol, nicotine, illicit drugs
- h. Unknown toxin management
- i. Snakebite

19. Dentistry

- a. Normal anatomical and physiological processes
- b. Disease grading system
- c. Proper dental radiographic technique
- d. Triadan numbering system/dental formula
- e. Malignant oral neoplasms (squamous cell carcinoma, oral melanoma)
- f. Tooth root abscess

- g. Oronasal fistulas
- h. Epulides
- i. Supernumerary teeth
- j. Retained deciduous teeth

20. Pharmacology – Recognize groups of drugs, their mechanisms, and clinically relevant side effects.

- a. Proper administration practices
- b. Medication calculations; use of weights and measures
- c. Fluid delivery systems
- d. Monitor therapeutic response
- e. Antibiotics
- f. Anti-inflammatories
- g. NSAIDS
- h. Controlled Drugs
- i. Chemotherapeutics
- j. Antifungals
- k. Anthelmintics
- 1. Antiseptics/disinfectants
- m. Ectoparasiticides
- n. Vaccines
- o. Anticonvulsants

21. Office Hospital Procedures

- a. Veterinary laws, regulation, and ethics
- b. Legal documentation and record keeping
- c. Controlled substance requirements
- d. Management of inventory control
- e. Disposal of hazardous materials
- f. Equipment and facility management
- g. Outstanding interpersonal and public relations interaction

AVTCP Small Animal (CANINE/FELINE) SUGGESTED READING LIST

McCurnin's Clinical Textbook for Veterinary Technicians. 9th ed. Joanna M. Bassert. Saunders. 2018. ISBN: 9780323394611

Merck Veterinary Manual. 11th ed. Cynthia M. Kahn and Scott Line. Wiley. 2016. ISBN: 978-0911910612

Mosby's Comprehensive Review for Veterinary Technicians. 5th ed. Monica M. Tighe and Marg Brown. Elsevier.2019. ISBN: 9780323596152 Saunders Comprehensive Veterinary Dictionary. 5th ed. V. P. Studdert, C. C. Gay, D. C. Blood. Elsevier.2020. ISBN: 9780702074639

Veterinary Technicians Daily Reference Guide: Canine and Feline. 3rd ed. C Jack, P Watson, V Heeren. Wiley. 2014. ISBN: 9781118810620

Acid-Base and Electrolyte Handbook for Veterinary Technicians. Angela Randels-Thorp and David Liss. Wiley. 2017. ISBN: 978-1-118-64654-0

Fluid Therapy for Veterinary Nurses and Technicians. Paula Hotston Moore. Butterworth-Heinemann. 2004. ISBN: 0750652837

Fluid Therapy for Veterinary Technicians and Nurses. Charlotte Donohoe. Wiley. 2012. ISBN: 978-0-8138-1484-1

Nutrition and Disease Management for Veterinary Technicians and Nurses. 2nd ed. Ann Wortinger and Kara Burns. Wiley-Blackwell. 2015. ISBN: 2901118509271

Small Animal Internal Medicine for Veterinary Technicians and Nurses. Linda Merrill. Wiley-Blackwell. 2012. ISBN: 9780813821641

Small Animal Emergency and Critical Care for Veterinary Technicians. 3rd ed. Andrea Battaglia and Andrea Steele. Saunders. 2016. ISBN: 978-0323227742

Veterinary Technician's Manual for Small Animal Emergency and Critical Care. 2nd ed. Christopher Norkus. Wiley-Blackwell. 2019. ISBN: 9781119179092

Anesthesia and Analgesia for Veterinary Technicians. 5th ed. John A. Thomas and Philip Lerche. Elsevier. 2016. ISBN: 978-0323249713

Anesthesia for Veterinary Technicians. Susan Bryant (editor). Wiley. 2010. ISBN: 978-0-8138-0586-3

Anaesthesia for Veterinary Nurses. 2nd ed. Liz Welsh. Wiley-Blackwell. 2009. ISBN: 978-1-4051-8673-5

Lavin's Radiography for Veterinary Technicians. 6th ed. Marg Brown and Lois Brown. Elsevier. 2018. ISBN: 9780323413671

Small Animal Dental Procedures for Veterinary Technicians and Nurses. Jeanna R. Perrone. Wiley. 2012. ISBN: 978-0-8138-2075-0

Plumb's Veterinary Drug Handbook, Donald C. Plumb, 9th ed. Wiley-Blackwell.2018. ISBN: 978-1-119-34445-2

Applied Pharmacology for the Veterinary Technician. 5th ed. Boyce P. Wanamaker and Kathy Massey. Saunders. 2015. ISBN: 9780323186629
